BEZZERA
MADE IN ITALY SINCE 1901

The Original Pioneer of Espresso Excellence

In 1901, Luigi Bezzera changed the world of coffee forever by inventing and patenting the first single-serving espresso machine. His groundbreaking innovation perfected the balance of water temperature and pressure, unlocking the rich, aromatic oils in coffee beans. By introducing pressurized steam for milk frothing, Bezzera made it possible to create the silky, velvety textures that define espresso drinks today.

What sets Bezzera apart?

- The original espresso machine maker, patented in Milan in 1901
- 120+ years of continuous espresso engineering, still built in Italy
- Built to extract full aroma, flavour and crema, cup after cup,
  shift after shift

Eagle Classic Espresso Machine

BEZZERA
MADE IN ITALY SINCE 1901

This model is a faithful tribute to the iconic espresso machines of the Belle Époque era, blending classical artistry with cutting-edge functionality. Handcrafted from the finest materials, the Eagle is available in a stunning polished brass or chrome finish, offering a showpiece design that matches its exceptional performance.

A large cup warming station above the unit adds convenience for busy service.

Its advanced dual boiler probe system ensures superior thermal stability and safety, while the powerful frothing capability delivers 3 litres of steam with just a 20-second recovery.

The Bezzera Eagle is as practical as it is beautiful, featuring fully flexible chromed copper steam and water arms, automatic boiler refill, and a built-in safety cut-out to prevent damage.

- Body available in Polished Brass
- 3 litres with 20-second recovery
- Dual boiler probe system for precision and safety

Victoria PID Espresso Machine

BEZZERA
MADE IN ITALY SINCE 1901

The Bezzera Victoria PID combines advanced espresso technology with refined Italian design, delivering exceptional performance for busy cafés and professional coffee venues. Leather, wood and mesh inserts complement its strong contemporary lines, creating a distinctive machine that enhances any front-of-house environment.

Its energy-efficient multi-boiler system features a dedicated copper service boiler for steam and hot water, plus independent boilers for each coffee group. PID temperature control, an intuitive TFT display and stable hydraulic architecture ensure precise extraction, consistent quality and reliable performance throughout demanding service periods.

- Energy-efficient multi-boiler system for high-volume service
- Independent boilers maintain stable group temperatures
- Dedicated copper boiler supplies steam and hot water
- PID control provides precise extraction temperature management
- TFT display controls temperature, doses and extraction times
- Automatic backflushing simplifies daily cleaning and maintenance
- Cool-touch steam wands improve comfort and operator safety
- Refined leather, wood and mesh design finishes
- Copper boiler backed by a 36-month boiler warranty

SA, WA, parts of QLD, VIC and NSW must run a Reverse Osmosis (RO) filtration due to the hardness of water to claim a valid warranty.

Moda DE PID Espresso Machine

Combines the practicality of a compact machine with the production capacity of a 2-group espresso coffee machine. Comes standard with two manual steam wands.

The thermal stability and productivity are guaranteed by a heating system that keeps a constant coffee temperature in case of maximum use. Special grids placed under the group clearance allows cups up to 13 cm high – as well as the traditional espresso cups.

- Independent brewing unit temperature control via PID (Picture-in-Display) thermostat
- Brewing timer for precise extraction
- Auto On/Off system for energy efficiency
- Programmable pre-infusion for enhanced flavour extraction
- Coffee counter to track usage
- Automatic group washing program for easy maintenance
- Copper insulated boiler for reduced power consumption and increased productivity
- Safety system featuring a boiler high-temperature cut-off thermostat and hydraulic overpressure
- Premium build with stainless steel AISI 304 stainless steel body and copper hydraulic system

Otto DE Auto-Foamer

The OTTO model combines the practicality of a compact espresso machine with the production capacity of a two-group system, making it ideal for high-demand environments.

Equipped with two manual steam wands, it ensures fast, efficient milk preparation. Its advanced heating system guarantees thermal stability, maintaining consistent coffee temperature even during peak use.

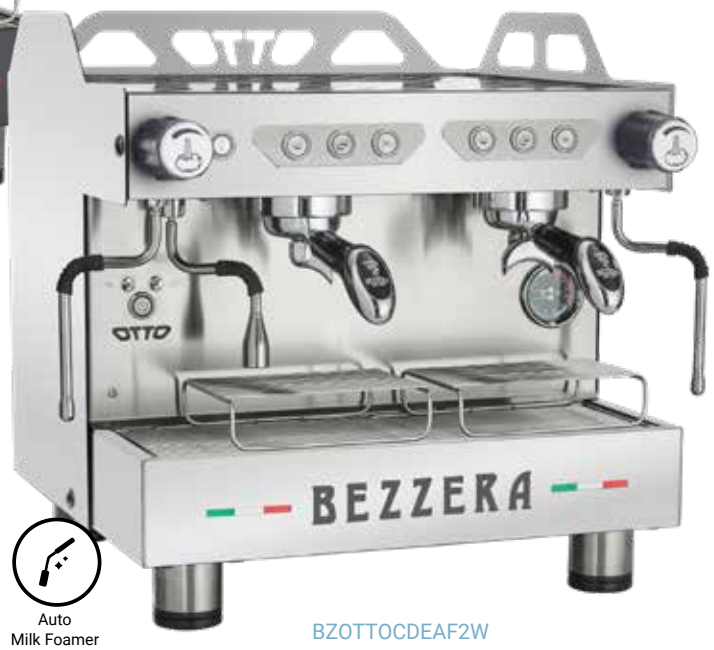

Each group is thermostated with a 100W heating element for precision temperature control under heavy workloads. An 8-litre copper boiler, powered by a 2800W resistance, delivers exceptional steam and hot water productivity.

The innovative AUTO-FOAMER steam wand allows you to create perfect milk foam at the desired temperature with the touch of a button — simply program your preferred settings once for consistent results.

- Automatic heating element shut-off in case of low water level
- Thermostated groups with 100W resistance for stable temperature
- 8L copper boiler with 2800W heating element for superior steam and hot water output
- **AUTO-FOAMER** steam wand for perfect milk foam at the press of a button

Bezzera Espresso Machine Installation

Ensure your espresso machine operates at peak performance from day one with our comprehensive installation pack. Designed for reliability and compliance, this package includes everything you need for a seamless setup and long-term protection of your investment.

- Pressure Limiting Valve
- Water Filter 5 micron
- Professional Machine Installation
- On-Site Bench Test

Code	Includes
NSWINSTAL VICINSTAL QLDINSTAL	Machine Install & Programming Grinder Calibration Onsite, Pressure Limiting Valve Essential Water Filter , Reverse Osmosis System available at extra cost, Bench Testing Onsite

Bezzera Electronic Commercial Grinder

The electronic doserless version without coffee dispenser allows the setting of 3 doses, through adjustment of the grinding time.

The coffee is ground directly into the filter holder.

- Aluminium body
- Flat Blade type 63mm dia with food friendly processing
- On-demand grinding with electronic dose adjustment
- Precise Grinding adjustment with a range of 0.01 mm per degree
- Daily production: approx. 3.5 kg of coffee beans.
- 1kg coffee-bean hopper capacity
- 3 doses with independent adjustment
- Colour capacitive touch screen display and button panel to control time and coffee dose
