

CG14-2TP DUAL LID CONTACT GRILL

Prince Castle's dual lid contact grill has two heated platens that consistently cook a variety of products from top and bottom. Each platen's temperature is independently regulated/maintained by solid state controller and four zone probe monitoring.

With two four-channel electronic, programmable timers, the Prince Castle contact grill incorporates an audible alarm to supervise and remind operators to check or remove products.

The CG14-2TP contact grill has a cool exterior base surface and upper platen guards provide added protection from the top heated surfaces during operation. Platen temperature set points are pre-programmed with built-in set point adjustment protection. Removing product build-up is simple with removable catch/drip tray.

Adjustable four position lid stops are also designed specifically for repetitive menu items and include closed position set point for daily cleaning.

CG14-2TP

STANDARD FEATURES:

- Solid state controls provide accurate temperature control
- Cooking surface is 355mm wide
- Cooking surface temperature range = 79°C to 302°C
- Durable stainless steel construction and heavy duty platens ensure long life and reliability
- Dual four channel electronic, programmable timers to track product grill times
- Adjustable four position lid stops provide consistent grilling of menu items and adjustment for cleaning
