 PASTEURISATION OF JARS

### FIXPAN: THE EFFICIENT PASTEURISER

The Fixpan pasteurizers are available in 48 different models (with gas, electrical or steam heating) and are the simplest and most immediate resource for cooking large quantities of food in water. With capacities from 100 to 550 litres, electronic control and autoclave pressure lid, these fixed industrial pans carry out with industrial precision and efficiency all the functions, including the possibility to perform the pasteurisation process on a product that is already packaged (e.g. jars).

### INDUSTRIAL PANS FOR PASTEURISATION OF JARS AND FOODS

Ideal for cooking in water and pasteurising food and jars, thanks to the optional “Cook & Chill” system you can carry out the cooking and cooling of the product inside the tank. All the pasteurisers, in the different available models, can be equipped with a “sample probe” that allows you to check the temperature at the core of the product. Thanks to its cylindrical shape, finally, cleaning operations are fast and effective.

Heating type	indirect electric
Capacity (L)	100
Surface (dmq)	-
Gas connection (Ø)	-
Electric connection (V/-/Hz)	3N+PE AC 400V 50/60 Hz

Width (mm)	1050
Depth (mm)	850
Height (mm)	900
Gas power (Mj/hr)	-
Electric power (kW)	16
